In lieu of a surety bond the applicant may file a cash bond or instrument of credit with the building official in an amount equal to that which would be required in the surety bond.

SECTION 3312 – CUTS

3312.1 General. Unless otherwise recommended in the approved soils engineering or engineering geology report, cuts shall conform to the provisions of this section.

In the absence of an approved soils engineering report, these provisions may be waived for minor cuts not intended to support structures.

3312.2 Slope. The slope of cut services shall be no steeper than is safe for the intended use and shall be no steeper than 1 unit vertical in 2 units horizontal (50% slope) unless the permittee furnishes a soils engineering or an engineering geology report, or both, stating that the site has been investigated and giving an opinion that a cut at a steeper slope ;will be stable and not create a hazard to public or private property.

SECTION 3313 – FILLS

3313.3 General. Unless otherwise recommended in the approved soils engineering report, fills shall conform to the provisions of this section.

In the absence of an approved soils engineering report, these provisions may be waived for minor fills not intended to support structures.

The bench under the toe of a fill on a slope steeper than 1 unit vertical in 5 units horizontal (20% slope) shall be at least 10 feet (3048 mm) wide. The area beyond the toe of fill shall be sloped for sheet overflow or a paved drain shall be provided. When fill is to be placed over a cut, the bench under the toe of fill shall be at least 10 feet (3048 mm) wide but the cut shall be made before placing the fill and acceptance by the soils engineer or engineering geologist or both as a suitable foundation for fill.

3313.3 fill Material. Detrimental amounts of organic material shall not be permitted in fills. Except as permitted by the building official, no rock or similar irreducible material with a maximum dimension greater than 12 (305 mm) shall be buried or placed in fills.

GRADING QUESTIONNAIRE

DO ANY OF THE FOLLOWING CONDITIONS APPLY TO YOUR SITE? PLEASE CHECK THE APPROPRIATE RESPONSE.

YES	NO	
		1. Will you be placing fill material that is NOT the material from an excavation for basements and footings of a building, retaining wall or other structure authorized by a valid building permit?
		2. Will you be placing fill, or creating a cut-slope near of your property lines?
		3. Will the placement of fill on your property change the direction of storm water runoff either by diverting runoff to a neighbor or creating ponding water on a neighbor's property?
		4. Will you be creating an excavation having an unsupported height greater than 5 feet after the completion of a basement, retaining wall or other structure authorized by a valid building permit?
		5. Will there be excavation which is greater than 2 feet in depth (excluding excavations for footings)?
		6. Will there be an excavation which creates a cut slope greater than 5 feet in height, and steeper than 2 horizontal to 1 vertical?
		7. Will thee be fill greater than 1 foot in depth, and placed on natural terrain with a slope greater than 5 horizontal to 1 vertical?
		8. Will there be fill greater than 3 feet in depth?
		9. Will there be fill supporting a structure?
		10. Will there be fill greater than 50 cubic yards on any one lot?
		11. Will there be a fill which obstructs or changes the flow of a natural or manmade drainage course?

A "YES" RESPONSE TO ANY QUESTION MAY REQUIRE A GRADING PERMIT.
